Neil has £810.  
He wants to buy 18 tickets for a football match.  
Each ticket costs £38.60.

Show, by estimation, whether or not Neil has enough money to buy the tickets.

Balena has a garden in the shape of a circle of radius 10 m.  
He is going to cover the garden with grass seed to make a lawn.

Grass seed is sold in boxes.  
Each box of grass seed will cover  $46 \text{ m}^2$  of garden.

Balena wants to cover all the garden with grass seed.

Work out an estimate for the number of boxes of grass seed Balena needs.

Work out an estimate for the value of

$$\frac{5.79 \times 312}{0.523}$$

Jess rounds a number,  $x$ , to one decimal place.  
The result is 9.8.

Write down the error interval for  $x$ .
